HANDLES

New door handles are such a simple way to freshen up your look. Contemporary sleek metallic handles look great against black, white & gloss cabinet doors.

Round wooden finishes or an artfully distressed look will update your country kitchen, whilst classic cup handles can give a traditional kitchen a trendy twist. This simple & cost-effective update can really change the appearance of your kitchen.

TAPS

There's a lot to consider when buying your kitchen taps, starting with the type of water system you have. You then need to consider which type & style of tap is best for your kitchen. This means understanding your home's water pressure as well as your water system.

Low-pressure water system

The most common water system in the UK, a low-pressure water system is usually a cold water tank in the loft & a hot water cylinder in an airing cupboard. It's sometimes called a gravity-fed water system.

High-pressure water system

In a high-pressure water system, a combination boiler heats cold water directly from the cold mains supply as soon as you turn on a hot tap. The boiler is normally wall mounted in this system.

High-pressure (unvented) water system

An unvented high-pressure water system stores mains pressure water in a large strengthened hot water tank, usually found in the airing cupboard. Water is heated either by immersion heaters fitted into the side of the cylinder, or by a central heating boiler.

1 **2** **3** Number of tap holes.

High-pressure: Suitable for high pressure water systems only.

Low-pressure: Suitable for low or high pressure water systems only.

SINKS

Our stylish range will have the whole family fighting to do the washing up! Your kitchen sink is undoubtedly something you'll use every day, therefore it's a detail you want to get right. There's more to it than choosing a design style, you also need to think about what material your kitchen sink will be made from – you'll be living with your decision for years.

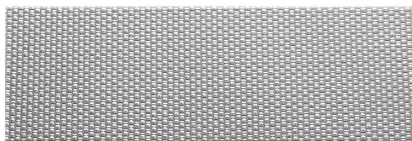

Our range explained

Available in a wide range of styles and finishes, you can choose a sink to suit your kitchen.

Stainless steel

Stainless Steel sinks are practical, durable and easy to maintain with the stresses of everyday use. They are highly resistant to chipping and cracking whilst looking stylish in your kitchen.

Linen finish stainless steel

Linen Finish Stainless Steel sinks offer all the features of standard stainless steel with the additional benefit of being scratch resistant due to the honeycomb texture.

Composite quartz

It's the real quartz added during the manufacture that gives composite sinks their durability. They withstand very high temperatures and are highly scratch resistant.

Resin

Constructed from a high quality made material, resin sinks offer high resistance to everyday wear & tear, whilst giving the look & feel of a composite material on a budget.

Ceramic

Handcrafted and baked fire clay, ceramic sinks are silky to the touch and wipe down easily after use without staining.

Spare bendy lights

- 3 x 12v / 0.8W bendy lights

Clear effect L300 x W8 x H6mm **3820872**

APPLIANCES

Think carefully about your appliances & where they are located. If you have young children consider an oven at eye level so its safely out of reach & an induction hob that's secure against little fingers. If you're a budding chef you might require a double oven & a beautiful gas hob.

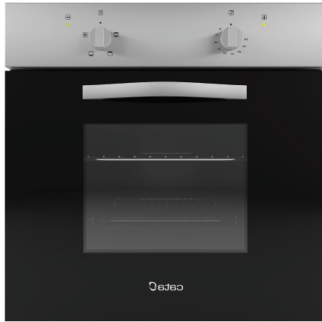

Think about the style of your kitchen, if you love contemporary styles maybe a gas-on-glass hob & oven with clean straight lines is the thing for you. For more traditional styles of kitchen a stunning range cooker & chimney hood could take your fancy.

FLOORING & TILING

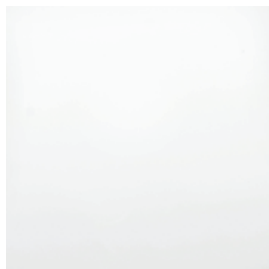

Laminate flooring comes in all kinds of colours & decorative effects to match the style of your room. It's surprisingly quick to install too.

Tiles can make a dramatic statement to any room, especially a kitchen. As well as sizes & colours, there are many materials of tile on offer – from ceramic & slate to travertine & wood effect.

SYMBOL GUIDE

Energy efficiency

These symbols tell you how energy efficient each appliance is with 'A' being the most efficient & 'D' being the least.

Oven & Hob

Different types of oven distribute the heat in different ways. There are 3 main options:

Fan oven

A fan at the back continuously circulates hot air for a more even heat distribution, which can cook more quickly.

Conventional oven

Heating elements at the top & bottom circulate hot air naturally, creating varying temperatures.

Multifunctional oven

Fan & conventional cooking in one oven. Plus, they offer a range of extra functions.

13 AMP Electrical connection

This symbol indicates the power supply in amps. This is a guideline only; speak to a qualified electrician.

18 Cooking functions

Some of our ovens have more than others including functions such as 'defrost' & 'gratin'.

30tr TOP Oven capacity

'Top' applies to the capacity of the second oven, normally used for cooking & grilling, in double ovens only.

Grilling

Some ovens offer full or half grill options, whilst some include a fan for a more even cooking result.

Grilling

Fan grilling

Half grilling

Fan with half grilling

Electric zones

Our electric hobs all include 4 electric zones.

Gas burners

Choose a model with 4 or 5 gas burners. Larger 5 burner models give extra cooking space & have a powerful wok burner.

Dual zone

This is a clever feature that means that larger griddles or pans can be used & because it is a user selectable zone, it means it can also be used as a single zone saving energy.

Power levels

The more power levels offered, the more flexibility you have to control the temperature.

Auto ignition

With no separate ignition control the result is a sleeker overall appearance.

Child safety lock

This clever safety feature allows you to lock the controls so that tiny hands can't turn the hob on whilst your back is turned.

25 AMP Electrical connection

This symbol indicates the power supply in amps. This is a guideline only; speak to a qualified electrician.

Dishwasher

Performance

A higher rating gives a better wash/drying performance. Wash is based on eco programme at 50°C & there are two types of drying action – natural (or residual) & hot air (or active).

Wash

Dry

Place settings

A place setting consists of a cup, a saucer, a bowl, a side plate, a dinner plate & cutlery.

Wash temperature

This indicates the number of temperatures you have to choose from.

16 How many programmes?

The higher the number the more options you have such as pre-washes for burnt on food & delicate washes.

Time delay

Integrated delay timer – you can run your dishwasher overnight when electricity may be cheaper.

Half wash

Models with this feature allow you to wash smaller loads on a setting that uses less energy & water.

Water consumption

Measured in litres, lower consumption machines can save you money on metered water bills.

Noise level

As an indicator, noise levels around 53dB are good. Some go as low as 41dB; as quiet as a boiling kettle

Fridge freezer

Star rating

This shows the operating temperature of the freezer.

Capacity

The capacity of a fridge or freezer is measured in litres – the higher the number, the more space you'll have.

Storage

The symbols below show you how many shelves or drawers the fridge/freezer compartments have.

Reversible doors

Most models you can choose whether they open to the left or right.

Frost free

Circulating cold air around the freezer prevents the build up of ice.

Auto defrost

An intelligent feature that defrosts automatically without ruining the food inside. Regular defrosting means lower energy bills.

Fast freeze

Ideal when you need to freeze larger amounts of fresh food enabling you to lower the temperature of all or part of your freezer.

Safe storage hours

The amount of time that your food will stay frozen in the event of a power cut

Hood

380 m³/hr Extraction rate

The rate of extraction is measured in cubic metres per hour (m³/hr); the higher the figure, the better the rate of extraction – this varies across different types of hood & between models.

3 SPEED Speed settings

This symbol indicates the number of speed settings available to extract or re-circulate air.

53dB(A) Noise level

Noise levels range between 46dB & 76dB.

Timer

Once the timer feature is activated the extractor will operate for 5 minutes at current speed & 5 minutes at each of the lower speeds until coming to a complete stop.

Washable filter

Filters are dishwasher safe – regular washing will provide maximum performance.

25 AMP Electrical connection

This symbol indicates the power supply (amps). This is a guideline only; speak to a qualified electrician.

2 VENT Vent pack

To extract air outside you will need a vent pack. This symbol appears below each product & shows which number vent pack you need to buy.

FILTER 1 Replacement filters

Replacement filters are available for products with this symbol.

Microwave

35ltr MAIN Capacity

Our microwaves range from 20 to 35 litres.

5 Power levels

Giving you the power, check out the number of levels for varying degrees of flexibility. Power levels allow you to fine tune or adapt your recipes – various types of food will require different power levels.

800w 1000w GRILL Output

Measured in Watts, from 800W to 1000W, the wattage determines the speed with which your microwave will cook. Generally the larger the capacity of the microwave oven, the higher the wattage will be.

Fan oven function?

The fan oven function allows you to use your microwave as a conventional oven. The fan oven function makes roasting & baking possible as air is circulated inside the cavity.

QS Quick start

When speed is of the essence, the quick start function lets you begin heating with the touch of a button. The microwave starts on full power for a pre-determined time.

Child safety

For safety first, microwaves with this feature allow you to lock the oven so that tiny fingers can't open or operate it without your knowledge.
