care.

- 1. 2. Switch off and remove the plug from the socket before making adjustments or fitting or changing the wheel.
- 3 Check that the cutting wheel is fitted correctly and that the guard is properly adjusted.
- 4. Always hold the chase cutter securely with both hands while working.
- 5. Make sure that the chase cutter is running at full speed before lowering it carefully onto the surface
- Be prepared for the reactive force when the wheel contacts the surface to be cut. 6. If the chase cutter starts to labour and slow down, do not force it so hard. Do not overload 7.
- the machine.
- 8. The machine can only cut in straight lines. Do not try to go round corners.
- 9. Only use the machine up to shoulder height. Arrange a suitable working platform if you need to cut grooves higher than this.
- 10. Stop the chase cutter if someone approaches you.
- Keep the cable clear of the cutting wheel 11.
- 12. If you think the cable may be cut or damaged in anyway, switch off and unplug at the socket before inspecting it. If the cable attached to the chase cutter is damaged, stop using the machine. Contact the hire company. If an extension cable has been damaged, do not use it again.
- 13. Take care not to accidentally pull the plug from the socket.
- 14. After switching off, wait for the wheel to stop completely before you put the machine down.
- 15. Switch off and remove the plug from the socket before leaving the cut-off saw unattended. 16. If your equipment does not work properly do not attempt to repair it. Contact the hire company.
